3 CONSTRUCTIONS

1) 7-PLY ULTRALITE

The original 7-Ply Ultralite Const. pressed in the LOK concave with Ultralite thin plys. This construction utilizes thinner veneers to create a light, stiff deck that won't go flat after a couple weeks of skating.

3 CONSTRUCTIONS

2) 6-PLY MICROLITE

READY RANGER SERIES

The AWS Microlite 6-Ply series offers a newer, improved configuration for Fall 1999. Four thinner outer plys sandwich two regular plys. This construction keeps concave consistent and offers less weight than our traditional 7-Ply. Comes in the proven LOK concave.

3) 7-PLY H.G.P. ULTRALITE

RIDE EVERYTHING SERIES

The AWS 7-Ply H.G.P. (High Gloss Paint) series have a coat of paint over the entire deck surface, top and bottom. This complete paint coverage ensures a slicker, stiffer deck than stained boards. Pressed in the LOK concave with Ultralite Const.
